

how to insert tall kitchen bags:

איך להכניס שקית לפח אשפה

Using a standard size trash bag with our cans is actually pretty easy. The first time, it may seem abit of a process and we are working on improving this to make it easier. However once you do it once, you will see it is really about grabbing excess bag into a small tail, tucking the tail under the rest of the bag, and putting the bucket back into the can.

step 1:
When using a standard tall kitchen bag, you will notice a lot of bag overhang over the rim of the bucket.

step 4:
Tuck the tail under the rest of the bag.

step 2:
Gather the extra bag so it is tight around he rim of the bucket and all of the excess is bunched together in one spot.

step 5:
Insert the bucket into the trash can

step 3:
Twist the excess bag until it is in a small tail.

step 6:
No ugly bag overhang.---
